

911 Springfield Avenue Apt 15  
Urbana, IL 60801

September 15, 2021

Dear Recruiter:

After viewing the position description listed on the company website, I felt very passionate for this position and had my resume submitted immediately. Being an employee at your company would allow me to utilize what I have learnt in classroom to solve practical problem.

Currently, I am a student at the University of Illinois at Urban-Champaign, pursuing dual degrees in Computer Science and Economics. With a solid coding base in C++, Java, and Python, I am managed to solve industrial problems efficiently and correctly. I am also good at SQL language, which enables me to organize and retrieve information from database. I have had an internship experience with a web-based video lecture system-ClassTranscribe, where I was responsible for the backend stability. Experience from ClassTranscribe has equipped me with hard skills in system programming, such as Docker, and soft skills such as group working and public communication abilities. I am also familiar with the field of artificial intelligence, with understanding of both theories and applications of machine learning, text mining, and data mining. I believe the experience I had so far has well prepared for this position.

I am very interested in this position and has my resume enclosed. I am eagerly looking forward to hearing from you and would appreciate a lot if there could be an opportunity for an interview. If you have more questions, you can contact me via phone (217) 721-8373 or through email [lijiaxi2018@gmail.com](mailto:lijiaxi2018@gmail.com). Thank you for the consideration.

Sincerely,  
Jiaxi Li
